

FAISAL MEHMOOD

Software Engineer | .NET (C#) & MERN Stack Developer | ASP.NET Core • React.js • Node.js • MongoDB

+92 348 5785805 | fmagray287@gmail.com | github.com/FaisalMagray21

SUMMARY

Full Stack Software Engineer with hands-on experience in C# / .NET Core backend development alongside strong MERN stack (React.js, Node.js, Express.js, MongoDB) expertise. Skilled in designing and building secure, scalable REST APIs, relational and NoSQL database design, authentication (JWT, OAuth) and role-based access control. Proven track record delivering production applications, including multi-vendor eCommerce platforms, real-time systems, and API-driven products, with a strong focus on clean architecture, performance, and maintainable code.

TECH STACK

Backend: C#, .NET Core, ASP.NET Core Web API, Node.js, Express.js, REST APIs

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, React Native

Databases: MongoDB, MySQL, SQL Server

Authentication & Security: JWT Authentication, OAuth (Google/Passport.js), Role-Based Access Control (RBAC)

Tools: Git, GitHub, Postman, Jira, Vercel

Development Areas: API Integration & Design, Database Design, eCommerce Systems, Real-Time Features (Socket.io), Agile Development

WORK EXPERIENCE

Frontend Developer — Hifi Marketing

Apr 2026 – May 2026

- Maintained and improved frontend pages for BizTrack, a live business management platform, using Next.js.
- Fixed responsive layout issues across dashboard screens and improved cross-device consistency.
- Improved UI consistency, navigation flow, and component structure for production use.
- Worked directly on production frontend code for a live, in-use business platform.

Live Project: <https://biztrack.uk/>

Software Development Engineer — Mellocity

Mar 2025 – Sep 2025

- Developed and maintained web and mobile application features using the MERN stack and React Native.
- Integrated REST APIs and implemented core eCommerce functionality including product, order, and user workflows.
- Owned authentication, frontend UI improvements, and backend API integration end-to-end.
- Collaborated in an Agile development environment, contributing to feature delivery, testing, and bug fixing.
- Used Git, GitHub, Jira, and Postman for version control, task tracking, and API testing.

PROJECTS

CoderBunnyz — Kids Coding Learning Platform (Final Year Project)

Stack: React.js (Frontend), C# / .NET Core Web API (Backend), SQL Server | [GitHub: FaisalMagray21/fypcoderbunnyz](https://github.com/FaisalMagray21/fypcoderbunnyz)

- Designed and built an interactive full-stack learning platform teaching basic programming concepts to children aged 7+.
- Built the backend entirely in C# using ASP.NET Core Web API, with a layered architecture for controllers, services, and data access.
- Designed and implemented REST APIs in .NET Core covering lessons, users, and learning-progress tracking, backed by SQL Server.
- Developed structured, gamified learning modules with a child-friendly UI and step-by-step lesson progression.
- Built a user progress-tracking system to monitor lesson completion and learner activity over time.
- Focused end-to-end on usability, simple navigation, and an engaging, age-appropriate interactive learning experience.

AI Resume Builder

Stack: React.js, Node.js, Express.js, MongoDB, OpenAI API, JWT | [Live](#) | [GitHub](#)

- Built a full-stack AI Resume Builder (MERN) with 8+ pages and 20+ reusable React components, including 4 customizable resume templates.
- Designed and developed 13 RESTful API endpoints for authentication, resume CRUD, and AI-powered content generation.

- Integrated the OpenAI API across 4 AI features (summary/job/project enhancement and resume parsing) to auto-generate ATS-friendly content.
- Implemented secure JWT authentication with protected routes and user-specific resume storage.
- Built a PDF export pipeline enabling one-click, print-ready resume downloads; deployed on Vercel with ImageKit-powered image optimization.

Lunio — Multi-Vendor eCommerce Platform

Stack: React.js, Node.js, Express.js, MongoDB, Socket.io, Passport.js | [Live](#) | [GitHub](#)

- Built a multivendor MERN e-commerce platform with 30+ responsive React components across buyer, seller, and blog modules.
- Architected 35+ REST API endpoints covering authentication, product catalog, orders, reviews, and blog features.
- Implemented secure authentication with JWT + Google OAuth (Passport.js) and email OTP verification via Nodemailer.
- Built a seller dashboard with sales analytics and a buyer dashboard with order tracking, favorites, and reviews.
- Enabled multi-image product uploads (up to 5 per listing) with category-based search and filtering.

Waste-to-Resource Exchange & Management System

Stack: React.js, Node.js, Express.js, MongoDB, Socket.io | [GitHub](#)

- Developed a full-stack Waste-to-Resource Exchange platform (MERN) with 3 role-based dashboards (Admin, Donor, Buyer) across 16+ screens.
- Designed 18 REST API endpoints covering authentication, item listings, real-time messaging, notifications, and admin controls.
- Implemented real-time chat and notification features using Socket.io for instant buyer-donor communication.
- Built role-based access control (RBAC) with JWT authentication securing 3 distinct user roles.
- Enabled multi-image listing uploads (up to 3 images) with Multer, plus location-based item search.

KEY ACHIEVEMENTS

- Built and deployed 3+ full-stack MERN applications, 2 of them live in production.
- Designed and developed 65+ REST API endpoints across multiple projects.
- Built a multi-vendor eCommerce platform (Lunio) with JWT + Google OAuth authentication.
- Developed an AI-powered Resume Builder integrating OpenAI for automated content generation.
- Implemented real-time features (chat, notifications) using Socket.io.
- Contributed to a live production Next.js platform (biztrack.uk) at Hifi Marketing.
- Built role-based access control (RBAC) systems supporting multiple user roles (Admin, Donor, Buyer/Seller).

EDUCATION

Bachelor of Science in Software Engineering — Barani Institute of Information Technology (BIIT) *Sept 2022 – May 2026*

- Relevant Areas: Software Development, Databases, APIs, System Design

CERTIFICATIONS

MERN Stack Development: KG Coding | Online Program | June 2024 – Dec 2024
